

Gems or Jewellery Quality Report

Ref: RNM00810281/RNM00810273
26G102-2/2

RING: traditional sapphire and man-made spinel cluster, 3.46 grams

RING MOUNT... Assembled cast in 9ct yellow gold, 9ct white gold, tested by XRF, stamped "9c".
10.0 mm white gold squared claw set cluster head with a wire basket back, on a peaked yellow gold peaked underplate and a 3.5 mm flat band with an inside diameter measuring 18.0 mm.
In good condition.

NATURAL SAPPHIRE ... One is claw set, square mixed cut, approx. 5.2 x 4.6 mm in size, estimated 0.61 carats in weight, dark greenish blue in colour, of good commercial quality, lightly abraded crown.

** Unless otherwise stated all coloured gemstones are assumed to have undergone colour and/or clarity enhancement treatments that do not require disclosure. Only treatments for which disclosure is required, and that have been identified, are reported here. Some disclosable treatments require advanced scientific testing to identify and may therefore not be reported. Some treatments are not permanent and may require extra care. Emeralds in particular are almost always treated with oil or other clarity enhancements.

MAN-MADE SPINEL ... Twelve are claw set, round mixed cut, approx. 1.9-2.0 mm in size, estimated to total 0.36 carats, colourless, of good commercial quality.

NZ \$1 = US \$0.56

This independent Quality Report provides a non-destructive analysis of the nature and quality of this item as accurately as possible, given the limitations imposed by such things as gems being set, using current standard gemmological methods and jewellery industry description standards. The Report may be updated to a full insurance report by emailing GemLab info@gemlab.co.nz with a sales receipt and quoting the GL reference number above.
